GUASCH COMPONENTES Y ELECTRONICA DE POTENCIA

MISSION, VISION AND VALUES

Mission

Create value for our customers, employees, society and shareholders offering design solutions for control and transformation of electric power with maximum reliability and respect for the environment, more advanced technology and the best professional talent.

Vision

To become a reference point for the design, manufacture and supply of specific products, solutions and collaborative projects related to power electronics both nationally and internationally.

Values

Integrity. We act according to the commitments made with respect for people.

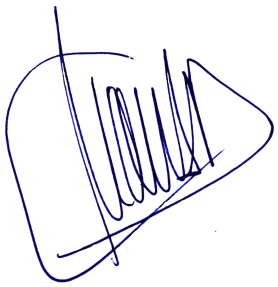

Experience. More than 30 years of constant work guarantee our ability to understand the needs of our customers.

Excellence. We maintain a quality management system at all levels offering reliable solutions.

Flexibility. Our agility in managing allows to adapt to the changing world and those who are to come.

Innovation. We reinvent ourselves every day with the aim of offering more and better products to satisfy our customers.

Collaboration. We establish a framework for collaboration with stakeholders to achieve common goals.
